A.D. 1853 N° 323.

Consumption or Burning of Smoke.

PROVISIONAL SPECIFICATION left by William Crossby at the Office of the Commissioners of Patents, with his Petition, on the 5th February 1853.

(Void by reason of notice to proceed not having been given within the 5 time prescribed by the Act.)

I, WILLIAM CROSSBY, of Sheffield, in the County of York, do hereby declare the nature of the said Invention for “**THE CONSUMPTION OR BURNING OF SMOKE**” to be as follows; namely, to be accomplished by the use of coke or coal fires, the bars being moveable or other-
10 wise, and perforated with holes, so that an iron or metallic rod or rods can be used in clearing the holes, and by these means giving the necessary air to the fire or fires, and thus assist in burning or consuming the smoke, and by flues carrying it from the coke or coal fire over one or more other coke or coal fires, so that by these
15 means the smoke will be burned or consumed; the flues being kept heated, a great consumption of fuel will be saved, and the heat will be more regular, and the nuisance of the smoke done away with, or greatly diminished.
